DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what the applicant means by an "extension direction" as recited in claim 14.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5-6, 9-10, 16-17, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by De Palma (U.S. Patent No. 3,893,748). De Palma teaches a front projection screen comprising a transparent base 102 a diffusion member 101 and a retroreflective prism

array 104. The applicant is directed to review figure 11 and 12. Col. 5, lines 1-3 teach that there may be a reflective coating applied.

Claims 1, 3, 5-7, 9-11, 13-15, and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Van De Ven (U.S. Patent No. 4,911,529). Van De Ven teaches a front projection screen comprising a transparent base, a diffusion member 20, 21 and a retroreflective prism array 26 and a light absorbing portion 27. The applicant is directed to review figure 5.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 7, 11, and 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Palma (U.S. Patent No. 3,893,748) in view of Cawley (U.S. Patent No. 1,610,423). De Palma teaches the salient features of the claimed invention except for a light absorbing layer behind the retroreflective layer. Cawley teaches that it was known to provide such a light absorbing layer 13. The applicant is directed to review figure 5. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features as taught by Cawley for the purpose of preventing interference from light behind the screen.

Conclusion

Art Unit: 2851

Allowable Subject Matter

Claims 4, 8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
